

This diagram illustrates the exploded view of a refrigerator assembly, showing the relationship between various components. The main body (18028) is shown at the top, with the door (17229) to its right. The interior components, including the evaporator (10458), condenser (10470), and compressor (10489), are shown in the center. The bottom section shows the base (18020) and the lower door (17227). The diagram includes numerous numbered parts, such as screws (e.g., 20841, 20890, 20895), nuts (e.g., 20846, 20847), and other hardware (e.g., 20841, 20890, 20895). The diagram also shows the connection of the power cord (20708) and the water line (20715) to the unit. The label 'TANK' is used to identify the water reservoir component.
